Features and Benefits

Bubble tight seal and no leakage

PTFE does not react to most of the chemicals used in modern chemical processing – even at high temperatures and high pressures. It is recognised as an ideal material for industrial valves that handle highly corrosive fluids. PTFE has a low friction coefficient and excellent lubricity when used in contact with metal surfaces.

TOMOE's 841T and 842T butterfly valves take full advantage of the superior qualities of PTFE: it protects all wetted parts and guides all stems. The 841T and 842T valves have a proven record of excellent performance and long life in heavy duty applications requiring tight shut-off, low torque and smooth operation.

Triple seal prevents leakage

The special feature of TOMOE butterfly valves is the seat ring design. The interference between the disc and the raised central area of the seat ring shuts off the flow completely. The resilient elastomer seat cushion ensures reliable shut off for the life of the valve.

TOMOE butterfly valves are bi-directional and withstand pressures to 0.7 MPa from either direction.

The upper and lower positions of the seat ring, where the stem passes through, use a triple seal design to prevent leakage to the atmosphere as shown in the illustration.

General Description

Chemically resistant butterfly valves with a proven record of excellent performance and long life in heavy duty applications.

Where you can see advantages over other types of valves

1. In corrosion resistant pipelines requiring mechanical strength as well as heat resistance.

Chemical Industry: Chlorine gas, acentric acid, sulfuric acid, hydrochloric acid, and other highly corrosive fluids.

2. In non-toxic environments where the fluid must not contact any metallic or organic materials.

Food Industry: Cooking oil, seasoning, syrup, and other food products.

3. In reduced pressure or high temperature pipelines where conventional valves cannot be used because of piping space requirements and valve weight.

General Industry: Steam lines, hot air, special process gases, dyes, and so on.

4. In processes involving hazardous fluids that require clean pipelines free from machining burrs, scales, and grease.

Piping: Pipelines for oxygen and other highly oxidizing agents.

5. In processes requiring sanitation or vacuum service.

Handling: Processing food, transporting powder or granular solids.

6. In low temperature processes where low heat gain is an advantage.

Cooling: Cooling air, chilled water, and brine.

Standard Specifications

Type	841T	842T
Body shape (centring method)	Concentric design, wafer type	
Valve nominal size	350, 400, 450, 500, 600mm	350, 400, 450, 500, 600mm
Applicable flange standard	JIS 10K, ANSI 125 lb/150 lb, DIN PN10, BS 4504 PN10, BS 10Table E	
Face-to-face dimensions	Manufacturer standard	
Max. working pressure	0.7 MPa	
Seat leakage	Tight shut-off	
Flow direction	Bi-directional	
Pressure test	Body shell	1.05 MPa (Hydraulic)
	Seat leakage	0.7 MPa (Hydraulic)
Working temperature range	- 10 to 100 degrees C	
Working temperature in continuous use ※1	0 to 90 degrees C	
Standard materials	Body	FCD-S
	Disc	SCS14
	Stem	SUS316
	Seat ring	PTFE (back-up rubber: CR)
Top flange	Manufacturer standard	
Applicable gaskets	Rubber gasket cannot be used. Moulded gaskets require special dimensions (refer to dimension chart).	
	Off-the-shelf seat gaskets can be used for 350 to 400mm.	
Coating	450 to 600mm require special inner diameter dimensions (refer to dimension chart).	
	350mm and larger: Lacquer primer (Munsell N7)	

※1 "Working temperature in continuous use" stands for the temperature continuously kept exceeding one hour.

※2 Export license by Japanese Ministry is required 842T for all sizes. Please consult us the detail.

Remark 1: ○=Applicable

Remark 2: Butterfly valves are inserted into a pipe that was fitted with the disc when fully open.

In cases where you are using a pipe or flange that is less than the minimum inner pipe diameter, use is still possible if means are taken such as inserting a spacer between the valve and flange.
For details, please consult us.

600	24	20-M30×300×60	8-M30×80×66	16-U1 1/4×345×70	8-U1 1/4×100×70

Remarks:

1. Use thin hexagon nuts. For ANSI 125Lb and 150Lb, use heavy hexagon nuts.

2. If the nominal diameter of the unified screw exceeds 1 inch, make the threading 8 threads per inch.

3. The table above does not apply if the material used is a special material which is not SS400.

Example

Long bolts: 12 - M22 × 185 × 46
 N M L S

Long bolts and nuts (full thread)

Setting bolts (Hexagon bolts)

Setting bolts: 4 - M30 × 95 × 65
 (Hexagon bolts) N M L S
